

EKO POWER 520

Inhibits & Removes Bacteria, ALGAE Fungi, Organic Growth

Description

Biofouling is inevitable in every membrane system; however, using RO Eko Power 520 you can minimize the impact of biogrowth on the operation of your RO system. The right biocide program can reduce your need for membrane cleaning, reducing your overall cost of operation.

Key Features

- Blend of high performance non-oxidizing biocides.
- effective against wide spectrum micro-organisms.
- requires low dosage level for accelerated response followed by gradual action for effective removal of algae, fungi and bacteria.
- helps in keeping away biofouling and formation of biofilms in the membrane

Benefits

- High purity product - synthetic grade.
- Enhances the output water quality.
- Safe and simple to use.
- Concentrated solution.
- Eliminates the need of chlorination and de-chlorination of feed water.
- Totally chlorine free and biodegradable.

Packaging Size

Eko Power 520 comes under packaging size of 5 Kg/Can and 25 Kg/Can.

Technical Data

pH (as such)	7.0 - 8.0
Appearance	Clear Liquid
Specific Gravity	1.12 - 1.16
Water Solubility	Completely Soluble
Contents	Blend of Non-oxidizing Biocides
